About me

UX/UI & Product Designer with 2+ years of experience across SaaS, eCommerce, Healthcare, B2B, and more. I combine UX research, psychology, and clean, scalable UI design to build products that solve real user problems and drive measurable results. Strong advocate of research, iteration, and clear communication, translating complex ideas into intuitive, high-quality digital experiences.

Experience

Spesna *2025 - Present*

- → Leading idea-to-implementation design processes of various digital products, including websites, mobile apps, internal tools and management systems.
- → Conducting user research, competitive analysis, problem definition & solution processes.
- → Wireframing, UI design, creating UI kits, utilizing design systems, prototyping, testing, iterating.
- → Collaborating with design, management & development teams.

Tools

Figma
